

THE PRESENCE
YOU CAN'T MIX WITHOUT

BOGREN

A-CLASS VOCAL

Thank you for purchasing A-Class Vocal!

Here at Bogren we aim to provide artists and audio professionals with streamlined tools that deliver uncompromising results. A-Class Vocal gives your vocals presence, polish and sheen, all from one simple plugin.

Choose between the original Type A process for a smooth, high-end sheen, or our custom mod with richer harmonics and more compression. Set how hard you drive it, blend it to taste and get back to what matters most: the performance.

Cheers, and enjoy!

MORE FROM BOGREN

System Requirements

- Available as VST3 / AU / AAX
- Windows 10 or newer
- macOS 10.13 or newer (Intel & Apple Silicon Native)

Trial

A-Class Vocal comes with a 14-day free trial, with every feature available. When the trial ends, the plugin will still be available to demo for 60s. Click **Continue Evaluating** to start the demo; a countdown next to the gear icon shows how long is left.

Where to Find Your License

Your licenses can be found:

- On the purchase confirmation page
- In the purchase confirmation email
- After logging into your [Bogren account](#)

Activating Your License

1. The activation screen opens the first time you load the plugin. You can also open it at any time from the Settings menu with **License Info**.
2. Click **Activate License** and enter your license key. Choose **Start Trial** instead if you would like to try the plugin first.
3. No internet connection? Offline activation is offered after you choose Activate License.
4. Once activated, you are ready to go!

Deactivating

To move your license to another computer, open **License Info** from the Settings menu and deactivate this machine.

Header Bar

- 1 **Undo** - Undo your last change.

2 **Redo** - Redo the change you just undid.

3 **Preset** - Shows the name of the current preset. Click it to open the Preset menu, or use the arrows to step through presets.

4 **Snapshot A** - Select Snapshot A: a fast way to compare settings.
- 5 **Copy** - Copy the current settings to the other snapshot.

6 **Snapshot B** - Select Snapshot B: a fast way to compare settings.

7 **Settings** - Open the Settings menu. See the Settings Menu section for details.

Main Controls

- 1 **Input Level** - Shows the current signal level.

2 **In / Out** - Switches processing In (active) or Out (bypassed).

3 **Rec** - The original Type A process, for a smooth, high-end sheen.

4 **Mod** - Our custom mod, with richer harmonics and more compression.
- 5 **Drive** - Adjust how hard you hit the processing chain.

6 **Mix** - Phase-aligned blend between the dry and processed signal.

7 **Output** - Adjust the level after processing.

Tip: Hover over any control to see a short description of its function. Alt-click (Option-click on macOS) or double click a knob to reset it to its default value.

Settings Menu

Click the gear icon in the top right corner of the plugin to open the Settings menu.

About

Shows the version you are running. The About window also has an **Export Diagnostics** button, which can save a report if you need help from our support team.

License Info

View your license details, or deactivate the license on the current computer.

User Manual

Opens this manual (but you already knew that).

See Our Products

Opens the Bogren website in your web browser.

Settings

Opens the Settings window. See the next page for details.

Settings Window

Choose **Settings** from the Settings menu to open the Settings window. Hover over any setting to see a short description of it.

Display

Tooltips

Show or hide the short descriptions that appear when you hover over a control.

Show Values

Show or hide a control's current value when it is adjusted.

Remember Window Size

New instances of the plugin open at the size you last used.

The plugin window can be resized to suit your screen.

Processing

Low Latency / CPU Mode

Lower latency and CPU usage for recording applications. This setting applies to the current instance only.

Full Quality Exports

Offline bounces are rendered at full quality, even when Low Latency / CPU Mode is on. On by default, and applies to all instances.
