

AMPKNOB FATMAN & AMPKNOB DUET

AMPKNOB DUET & FATMAN

Thank you for purchasing!

Our mission at Bogren Digital is to provide artists and audio professionals with tools for creating top-quality music with joy and ease. We're proud to present Ampknob Duet and Ampknob Fatman, the latest addition to our arsenal of top-of-the-line guitar amplifier recreations.

These are two distinct plugins, inspired by two iconic 'clean' amplifiers. Each plugin offers a different slice of history, channeling iconic tones from the 1950s and 1960s.

Influencing the sound of music for over 60 years, these amps have been the go-to for guitar players of countless genres. In typical Ampknob style, we have captured the essence of each amp, giving you consistently killer tones from the moment you load the plugin to the moment you close it. Get the rich, velvety tones every guitar player lusts for, without any of the hassle.

Cheers, and enjoy!

File Locations

Bogren Digital Plug-ins are installed in the default locations for each plug-in format (VST3, AAX, AU, Standalone) unless a different, custom location is selected during installation.

MacOS

AudioUnits:

- Macintosh HD / Library / Audio / Plug-ins / Components

VST3:

- Macintosh HD / Library / Audio / Plug-ins / VST3

AAX:

- Macintosh HD / Library / Application Support / Avid / Audio / Plug-ins

Standalone App:

- Macintosh HD / Applications / Bogren Digital

Windows

64-bit VST3:

- C:\ Program Files \ Common Files \ VST3

64-bit AAX:

- C:\ Program Files \ Common Files \ Avid \ Audio \ Plug-Ins

64-bit Standalone:

- C:\ Program Files \ Bogren Digital

Footer Bar

1. In - Sets plugin input gain (-24dB to + 12dB).
2. Out - Sets plugin output gain (-12dB to + 6dB).
3. Room - Blend in an IR of a real studio live room, captured in stereo at Fascination Street Studios.
4. Pan (Available only with stereo output) - Controls the pan of the dry signal. The Room will remain unaffected and in full stereo.
5. Riff Recorder (Standalone only)
Press to start or stop recording your riffs. Alternatively, use the keyboard shortcut « r ».
6. Riff Folder (Standalone only) - Open your riff ideas folder. The recording location can be set in the global preferences menu.
7. Metronome (Standalone only) - Practice timing, and stay sharp with your guitar-playing skills.
8. Tuner - Opens the tuner window.
9. Cab - See specific plugin information for more details.
10. Settings - Opens the settings panel.

IO Settings menu

Available in Standalone only

Feedback Protection

By default, the input is muted to avoid unwanted feedback. Once you set up your input and output, it is safe to turn off the mute option.

Input: Select the input device.

Output: Select the output device.

Input Channels

Select the appropriate input channel(s) for your selected audio device. In most cases, you will want to select only one channel. Press CMD (Mac) or CTRL (Windows) + click to select two input channels, if needed.

Output Channels

Select the appropriate output channels for your selected audio device. For typical use, it is recommended to select two channels for output.

Sample Rate

Select the preferred sample rate. Higher values require more processing power.

IO Settings menu

Audio Buffer Size

Select the preferred audio buffer size. Lower values reduce latency (lag) when playing guitar, but increase the CPU load on your computer. This can sometimes introduce clicks and pops, and so it is recommended to set the audio buffer size to the minimum setting before introducing audible artifacts.

Test

Plays a sine sound to test your output setup. If you don't hear the sound, double-check your input and output settings.

Settings Audio

DSP Quality

Choose between the default - "High" - and a more CPU-efficient setting - "Normal (low CPU)" - in situations where your computer is struggling to run the plugin smoothly. The plugin will always default to "High" DSP quality when bouncing, to ensure maximum audio quality.

Settings

Show Values

Show or hide the pop ups displaying the value of the parameters you are adjusting.

Input Mode

Choose between mono or stereo modes. This option is available when two inputs are selected. Stereo should only be used when left and right inputs are different.
